GIQS e.V. – 10th anniversary week
Cross border cooperation on food safety and animal health

October 11-14, 2011 – Gut Havichhorst, Münster

To celebrate the 10th anniversary of GIQS e.V. our team would like to invite you to a series of events taking place in Münster between the 11th and the 14th of October 2011. A diverse agenda contains meetings and activities originating from different research projects and initiatives and is rounded off by selected social events in Münster city. We are looking forward to interesting presentations and vivid conversation.

After 10 years of cross border projects and international initiatives in the European agri-food business the GIQS expert network is grown to a representative image of the food production chain. Therefore this week’s programme is addressing all levels of the production chain: farmers, veterinarians, researchers, advisors, slaughterhouses and retail. We would be glad to receive your registration.

In this announcement you will find the week’s agenda and the preliminary programmes of the SafeGuard and Quarisma conference days. Finally we added information about the venue, the accommodations and the spatiality at Gut Havichhorst. If you have any question, please do not hesitate to contact Dr. Martin Hamer or Dr. Oliver Breuer at GIQS e.V.
Agenda of the GIQS 10th anniversary week

October 11th, 2011 – GIQS e.V.: project meetings and anniversary dinner
11.00 – 17.00  Project meeting Fin-Q.NRW
18.00 – 20.00  GIQS general assembly
20.00  Dinner and welcome of conference participants

October 12th, 2011 – SAFEGuard conference
9.00  Opening ceremony
10.00  Plenary session I – Animal diseases
13.30  Plenary session II – Zoonoses
16.15  Plenary session III – Food safety
18.30  Social programme

October 13th, 2011 – QUARISMA conference
9.00  Quarisma project: introduction
9.30  Salmonella training introduction
10.00  European Commission
10.20  Primary production
11.00  Meat processing
11.40  Monitoring and analytics
14.00  Panel discussion

October 14th, 2011 – Workshops day
9.00 – 12.00  Workshops on international and cross border cooperation
12.00  Lunch and closure of the GIQS e.V. 10th anniversary week
Nowadays, cross border cooperation issues are taken for granted by public and private stakeholders in the Dutch – German border area. During the last ten years we have seen political agreements on common approaches, cross border research projects, regular round tables and the preparation of a first cross border crisis management exercise that is recently going to take place.

In order to continue this success story increasing effort of all partys is necessary. The INTERREG IV A SafeGuard project has been launched in 2009 not only in order to find solutions for specific challenges in animal disease control or food safety issues but first of all to work on cross border concepts that enables stakeholders to proceed their activities on a sustainable level.

Almost three years later the SafeGuard conference contains all mid term results of this INTERREG IV A project. The Dutch and German project partners are presenting their findings in order to increase knowledge exchange with external parties. At the same time the internal debate between working groups will be smartened up so that the second half of the project will have a fresh start.

The programme contains a rich mixture of subjects from all over the cross border agri- and food business. It is designed as an international meeting addressing e.g. veterinarians, farmers, researchers, advisers as well as politicians. For the opening ceremony, the agriculture ministers from the Netherlands, Northrhine Westphalia and Lower Saxony have been invited to welcome the participants heartily in Münster.

Next to the conference programme a social programme will be prepared for the evening of October 12th. The historical background of Münster, being the town where the Netherlands have been founded by the Peace of Westphalia in 1648, will be a pleasant add-on to Dutch-German cooperation topics. Additionally, several bonus agendas will be added to the conference programm, like e.g. visiting laboratories of the SafeGuard projectpartners CVUA MEL and Universitätsklinikum Münster.

If you are interested in participation or if you want to know more about the conference day please contact Oliver Breuer (+49-228-73-2060; o.breuer@giqs.org) at GIQS e.V.

QUARISMA CONFERENCE
Prevention and control of zoonotic agents in poultry and pig holdings:
Salmonella management in the cross border area

13 October 2011
Gut Havichhorst, Münster

Quarisma is a European project containing partners from industry and science. It is funded by IAPP (Industry-Academia Partnerships and Pathways), which is an element of the specific Programme Marie-Curie Actions of the EU 7th Framework Programme. Quarisma represents an interdisciplinary and intersectoral cooperation in the European meat production. The various research collaborations between the two Universities of Bonn and Wageningen as well as six private organisations in the meat sector coordinated by GIQS e.V. are focussed on quality and risk management in meat chains. In Quarisma concepts on cross border training and education are developed and tested. On this conference a salmonella training developed in Quarisma will be performed.

The aim of this training is a cross border knowledge exchange about the implementation of the EU directive 2003/99/EC and all relevant pieces of legislation enclosed: e.g. monitoring of zoonoses, antimicrobial resistences and the control of salmonella in food coming from pig and poultry. The training content is designed to comply with the needs of farmers, veterinarians and consultants that are dealing with zoonotic challenges in practice. In this training programme two aspects are particularly important: first of all, to adress both public and private issues and secondly, to compare approaches and ideas from the Netherlands and from Germany in order to identify possible fields of cooperation between two running systems in a strongly connected production area.

From the European Commission Mrs. Rosa Peran i Sala has been invited to share the EU’s point of view on managing zoonotic agents. The following training lectures are carried out by several trainers from the Netherlands and from Germany. All trainers participating at this event have rich experiences in practice and are currently working for an institution that contributes to the management process on zoonotic agents. The lectures will be followed by a panel discussion, where participants can bring up questions or features from their practical experiences.

The training presentations will be given in English. During the panel discussion contributions in German and Dutch are very welcome as well. Before the training starts a short presentation will be given on the Quarisma project which is funded in order to develop training and education programmes for the Dutch German meat chains.

If you are interested in participation or if you want to know more about the training day please do contact Oliver Breuer (+49-228-73-2060; o.breuer@giqs.org) at GIQS e.V.

The research leading to these results has received funding from the European Community's Seventh Framework Programme FP7/2007-2013 under grant agreement n° [22 88 21].

Our venue: Münster in Westfalen

About Münster
Münster is a multi-faceted city of approx. 280,000 inhabitants. It is a city of science and learning, the City of Westphalian Peace, the capital city of bicycles and Germany’s Climate Protection Capital. Westphalia’s longstanding regional capital is a young city, not least thanks to around 47,000 students. It is an outstanding place to live, work, learn and research. It is a place where urban culture, municipal diversity and first-class rural recreation intersect and have a mutually enhancing effect. Münster’s roots can be traced back to the 6th century AD. However, the city officially came into existence in 793, when Frisian missionary Liudger founded the "Monasterium" cloister. Münster became a cathedral city as early as 805, and the city remains an active centre of the Roman-Catholic church.

Economic location
Münster is the creative "desk of Westphalia". Greater Münster is peppered with public authorities, consulting companies, insurance companies, banks, computer centres, publishing houses and advertising and design agencies. With a total turnover of around 1.9 billion euros, the retail trade is an important economic factor. With its traditional merchants’ townhouses and more modern outlets, such as the Münster arcades and the Stubengasse, the historic centre is a consumer magnet.

Peace of Westphalia
The Peace of Westphalia, signed in Münster and Osnabrück in 1648, did not merely end the Thirty Years’ War, and with it an unimaginable epidemic of murder, which laid waste to and depopulated entire areas: It simultaneously established a European peace administration advocating the equality between states and made a significant contribution to the formation of modern international law. The United Provinces of the Netherlands achieved independence from Habsburg Spain during the negotiations in Münster. This is one of the reasons why the city is so popular with Dutch visitors, who often visit the historic Town Hall with the Peace Hall and the "Krameramtshaus" guild house.

Haus der Niederlande
This Renaissance building, which dates back to the year 1589, is one of the oldest guild houses in Münster. The building was used by the grocers’ guild as a meeting point and storehouse. The building was used to house the Dutch emissaries during the negotiations which led to the Peace of Westphalia. It has been home to the Science and Cultural Centre "Haus der Niederlande" since 1995. Exhibitions, book presentations, lectures and film showings are organised here.
